Census Data

Some of the data used in this profile is taken from the 2011 Census; where this is the case, this is clearly labelled. Though this data is from several years ago, the breadth and volume of information the Census collects means it remains a valuable source of data and a reasonable indication of current trends. Data from the 2021 Census, which will be reflective of the new boundaries, will be released by the Office for National Statistics in 2022/3. When this happens, this profile will be updated and circulated to Councillors.

3.1% of Andover residents are long-term sick or disabled (2011 Census)

Deprivation

The English Index of Multiple Deprivation 2019 is designed to identify areas where communities lack resources and are in need. To do this, seven factors are considered, which are:

- income deprivation;
- employment deprivation;
- education, skills and training deprivation;
- health deprivation and disability;
- crime;
- barriers to housing and services;
- living environment deprivation.

Areas are scored on each of these factors, and ranked nationally from least deprived to most deprived.

This map shows the deprivation scores for Andover against all areas in Test Valley. Andover is made up of 25 different Lower Super Output Areas, these are geographies created by the Office for National Statistics that include an average of 1,500 people.

As the map shows, the Output Areas that make up Andover vary widely in their deprivation rankings. A number of areas (particularly to the south-east of the town) are within the 10% of least deprived areas in the country. Similarly, several areas in the centre and north of the town are within the top 30% of most deprived areas in the country.

Further information about the Ministry of Housing, Communities and Local Government 2019 English Indices of Deprivation is available online at: <https://www.gov.uk/government/statistics/english-indices-of-deprivation-2019>

According to the 2011 Census, 75.8% of Andover residents aged 16-74 are economically active, higher than Test Valley as a whole where the figure is 73.4% of residents. This includes people in full-, part- and self-employment, those who are actively seeking a job, and full-time students.

The remaining 24.2% of residents aged 16-74 are economically inactive, compared to 26.6% of Test Valley residents. This includes people who are retired, long-term sick or disabled, or who look after the home and family.

Employment by sector

Following the Local Government Boundary Commission for England (LGBCE) review in 2017, new Ward and Parish boundaries have been introduced in Test Valley. Hence, this information has been produced on a 'best fit' basis, it's not an exact representation of Andover but provides as good an indication as is currently feasible.

This data is taken from the 2018 UK Business Register and Employment Survey which is produced by the Office for National Statistics (ONS). This dataset relies upon a sample of 85,000 businesses across the country, from which these estimates are modelled. As such, there will be some sampling variability which result in the quality of the estimates deteriorating for smaller geographies. A better indication will be available from the 2021 Census which will be available in 2022/3; once this data is released, this profile will be updated and circulated to Borough and Parish Councillors.

This graph shows the percentage of the workforce by sector, according to the latest Business Register and Employment Survey in 2018. The largest sector employing people in Andover is Retail (24.2%) followed by Manufacturing (12.3%) and then Health (9.3%)
