**Subject:** Local Planning.

Dear Sir/Madam

I wish to add my thought on the local planning issue for the future.

I am aware we need to build homes and there is a shortage, but we live in a area that is slowly becoming more crowded, built up, congested and noiser too. There is already a very large development going on in Chestnut Way leading onto the motorway in Eastleigh opposite the Concorde Club and Eastleigh Football Club, which is going to have a major impact during rush hour. If we carry on building very large developments we will lose our green spaces and gaps and the whole area will become one concrete jungle and a lot of us have moved into this area to get away from this. Also each community will loose its identity.

I know we have to provide accommodation and facilities for the future, but we do need to take into consideration the advantages of our green spaces and the benefit green spaces have on the environment regarding pollution and also the well-being on us as individuals. When large developments are built more cars come with the houses, as people seem to have more then one car per household nowadays. More cars, more pollution and more health problems too.

I not a NIMBY, but appreciate the importance of green spaces and the benefits they bring with them and the countryside around Ampfield is important.

Your faithfully,

Elizabeth Chapman, Eastleigh Residents
