

Test Valley Borough Council Review of Polling Districts and Polling Places

(Acting) Returning Officer's Recommendations 2019

1. Introduction

This sets out the (Acting) Returning Officer's Submission to the above Review. It primarily deals with the suitability of existing polling stations, and where appropriate proposes possible alternatives (which may require further investigation to determine their availability and suitability). It also includes information on the current polling districts, proposals to merge/combine polling districts, and the number of electors per polling district. The submission is ordered by Borough Ward.

2. Polling Stations

Each polling district requires a polling station, and save where special circumstances apply, the polling station must be located within the polling district. Given the number of polling districts, and the rural location of many, it is often difficult to identify suitable premises within each polling district, and so a polling station in another polling district has to be used. If this is not possible, portable buildings are used instead.

Some premises which could be used as polling stations have regular bookings which venue managers are unwilling to cancel. In addition, the returning officer is not entitled to require the use of a building as a polling station, save for local authority schools.

In general terms, all of the buildings used as polling stations are considered to be fit for purpose, accessible to the majority of the electorate which the venue serves, and accessible for those with a disability. However, the layout of premises varies considerably. Older premises will have been designed to different standards, unlike modern premises which should have good disabled access. Many venue managers have improved access to their buildings, and temporary access facilities are employed as necessary, where a building is used without permanent access facilities built in.

In preparing for the Review, officers have researched possible alternative venues and taken account of the experience gained in the Borough and European elections held in May 2019.

I welcome comments on the suitability and accessibility of existing polling stations, any alternatives proposed in this Submission, and any other suitable venues that respondents consider could be used as polling stations.

3. Polling Districts

Polling districts are given a reference (e.g. SG1) and a name (e.g. Ampfield No. 3). As polling districts are primarily based on the parish which they are situated in, the name usually is linked to the parish name. Where a parish (or town) area is divided

into wards (e.g. Andover or Romsey) the name will be linked to the ward name, for ease of reference.

As a consequence of the reviews of the County Division and Borough Ward boundaries in 2016 and 2017 respectively, additional polling districts had to be created to reflect the changes to boundaries that were implemented by these reviews.

The Borough Council's Community Governance Review of 2018 allowed the Council to adjust parish boundaries in the light of these earlier reviews, and also propose "related alterations" to Borough Ward and County Division boundaries. All of the proposed alterations were accepted by the Local Government Boundary Commission for England, and this will allow the Polling District Review to delete some of these newly-created polling districts and combine them with other polling districts, simplifying the electoral administration process. These have been noted in the Submission.

Proposals have been made for changes to the Parliamentary Constituency boundaries, although Parliament has yet to consider and approve (or reject) these. These proposals used the former (pre-2017) Borough Ward boundaries as the "building blocks" for the proposed new constituencies. As a consequence, the proposals for polling districts have retained some small polling districts that would otherwise have been proposed for combining with adjacent polling districts, to avoid a further review if the Parliamentary proposals are approved in the future.

4. Detailed Proposals

The table below sets out the current and proposed reference and name of each polling district, and the polling station that is used. It also shows where a polling station is outside the polling district. The elector numbers for each polling district are given.

The final column in the table contains my recommendations for polling stations, and any changes to the associated polling district that would be proposed to be made under the Polling District Review.

Abbreviations used:-

PD – Polling District

PS – Polling Station

Ampfield and Braishfield
